DETAILED ACTION

The disclosure is objected to because of the following informalities: On page 3, line 33, it appears that "and" should read --an--. On page 17, line 15, should --73-- follow the first occurrence of "nail"? On page 19, line 7, "11b" should read --11a--. Throughout the written specification, it is not clear in what sense the hook profile 21 is of an "oblong" shape.

Appropriate correction is required.

The drawings are objected to because figures 1a, 1b, 2a and 2b should apparently be labeled as "Prior Art" (see page 5, lines 22 and 26 of the specification). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claims 14-20 are objected to because of the following informalities: Throughout the claims 14-20, it is not clear in what sense the hook profile 21 is of an "oblong" shape. Throughout the claims, applicant may use the term "comprises" instead of "consists", if desired. In claim 14, lines 30 and 33, the term "initiating" is unclear, since the arm 25 does not appear to initiate rotation of the hook 21 in the direction of disengagement (see line 33) upon touching the frontal surface 30. In claim 15, line 18, "chamber (5)" should read --chamber (4)--. In claim 18, line 17, "said at least one" is unclear, since line 3 of claim 18 claims "a single oblong hook profile". Appropriate correction is required.

Provided all of the above objections to claims 14-20 are overcome, claims 14-20 would be allowable. Applicant should also note that in claim 14, line 1,

Art Unit: 3676

"applicable to" is regarded by the examiner as positively claiming the "frame profiles" as a part of the "Lock assembly".

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
